

USING SNAP WITH MASCHINE JAM

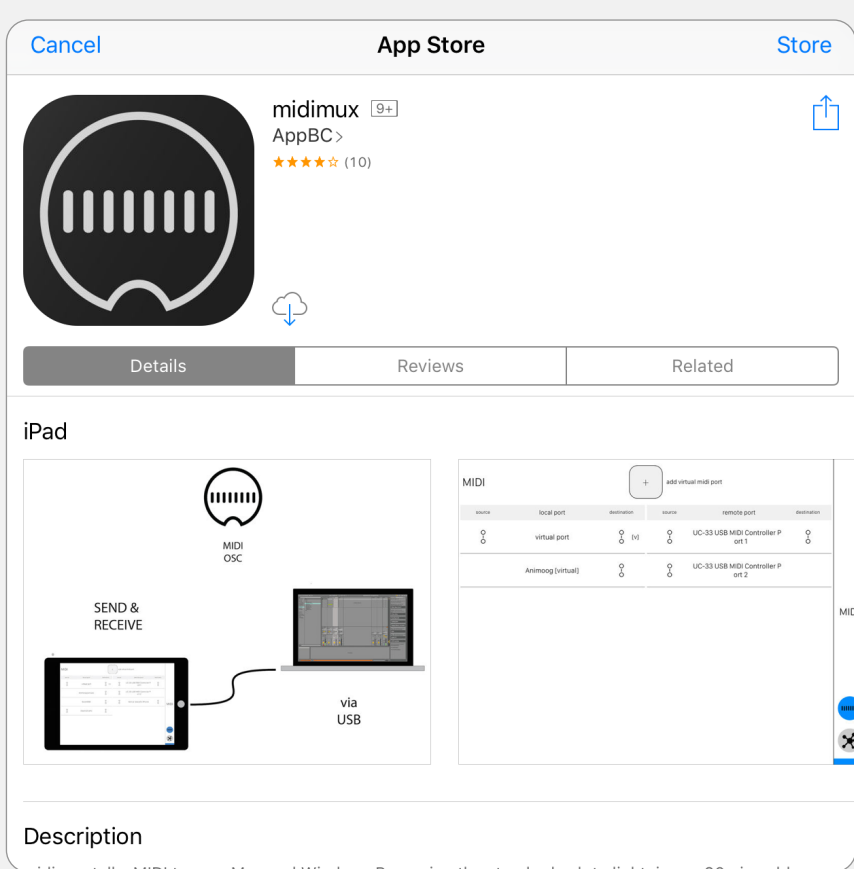

SNAP seamlessly integrates with Maschine JAM so you can perform with the controller and get instant updates on the app.

Tools that you will need:

- SNAP
- Maschine JAM
- midimux (iOS)
- studiomux (OSX or Windows)

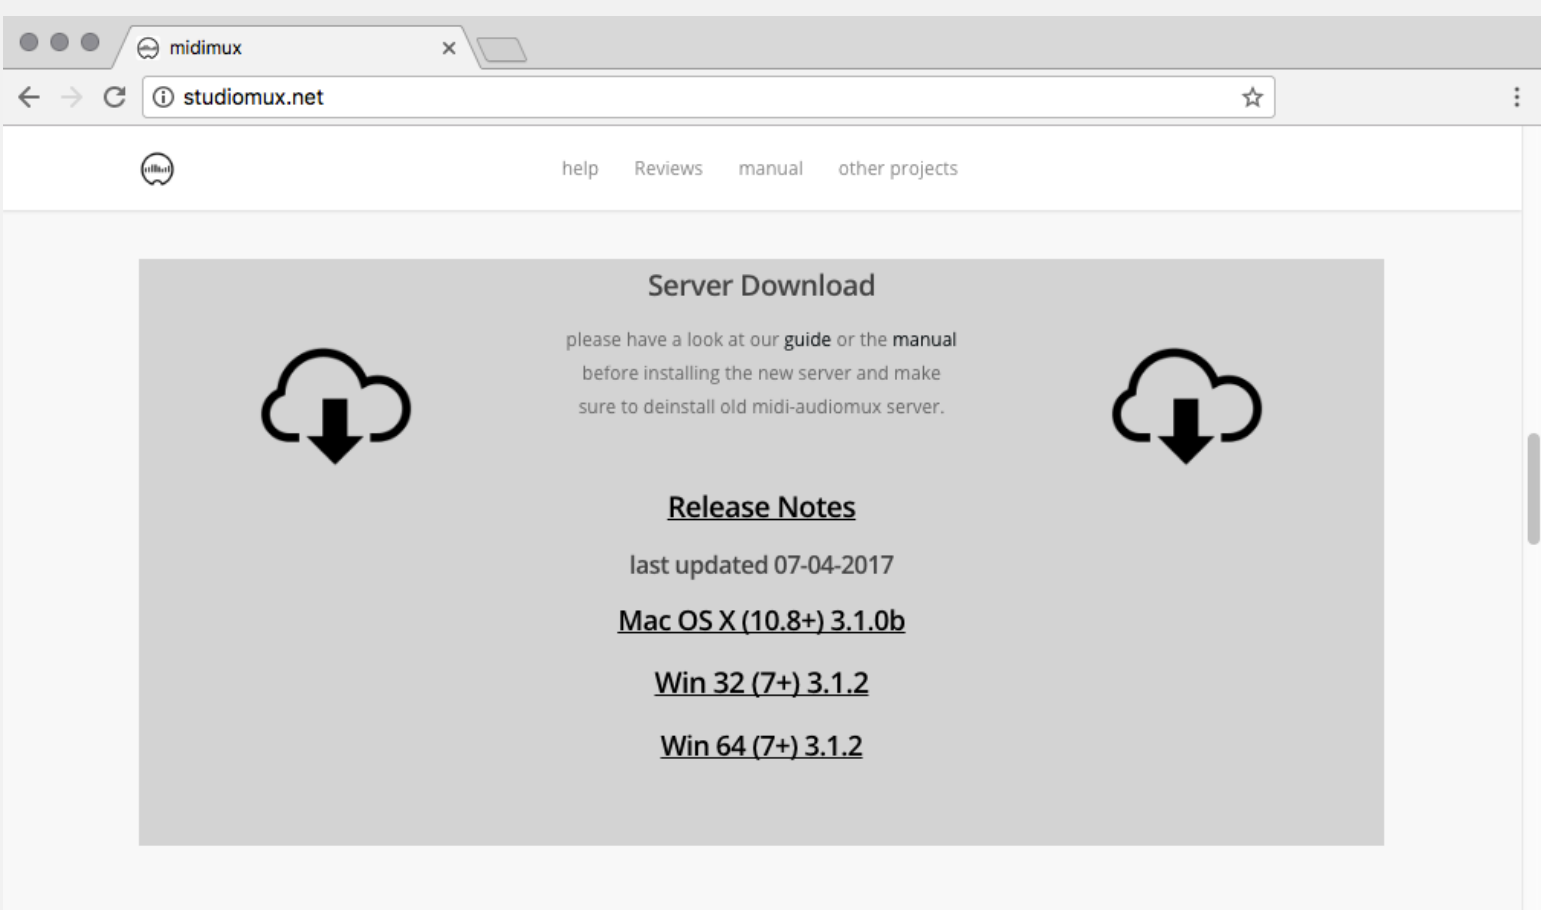

1 Download midimux iOS

Go to the iOS App Store and search for midimux, tap on the download button.

2 Download studiomux desktop app

Go to www.studiomux.net, download and install in your computer.

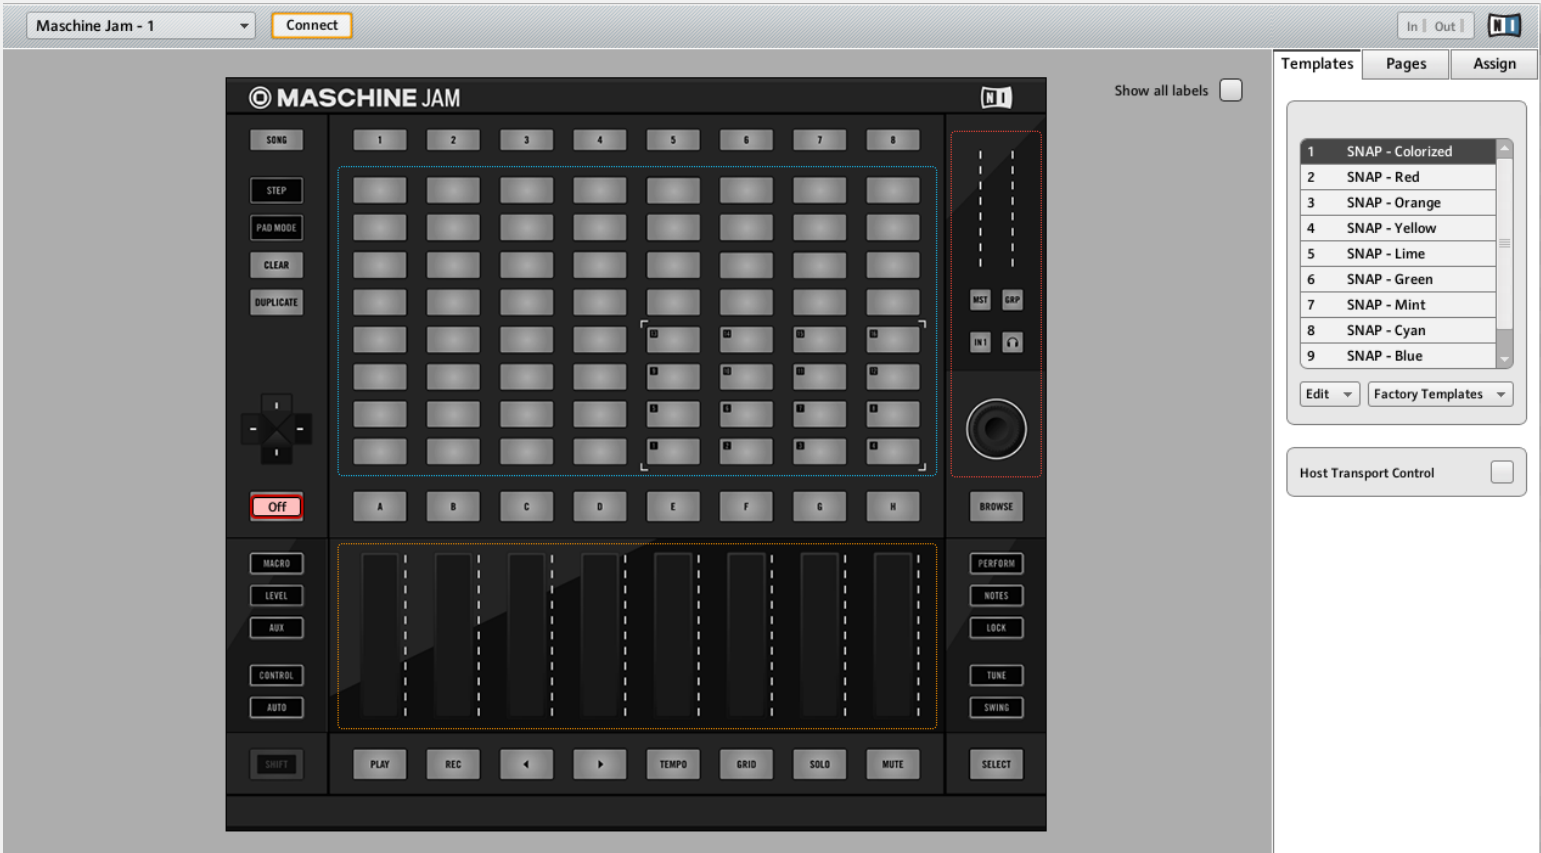

3 Download the Maschine JAM controller editor template

Visit www.reactable.com/snap and download the controller editor template.

4 Set up Machine JAM template

Open the SNAP-Template.ncc file, you'll see something like this:

Then select the template based on on how you want the sliders too look like.

5 Important!

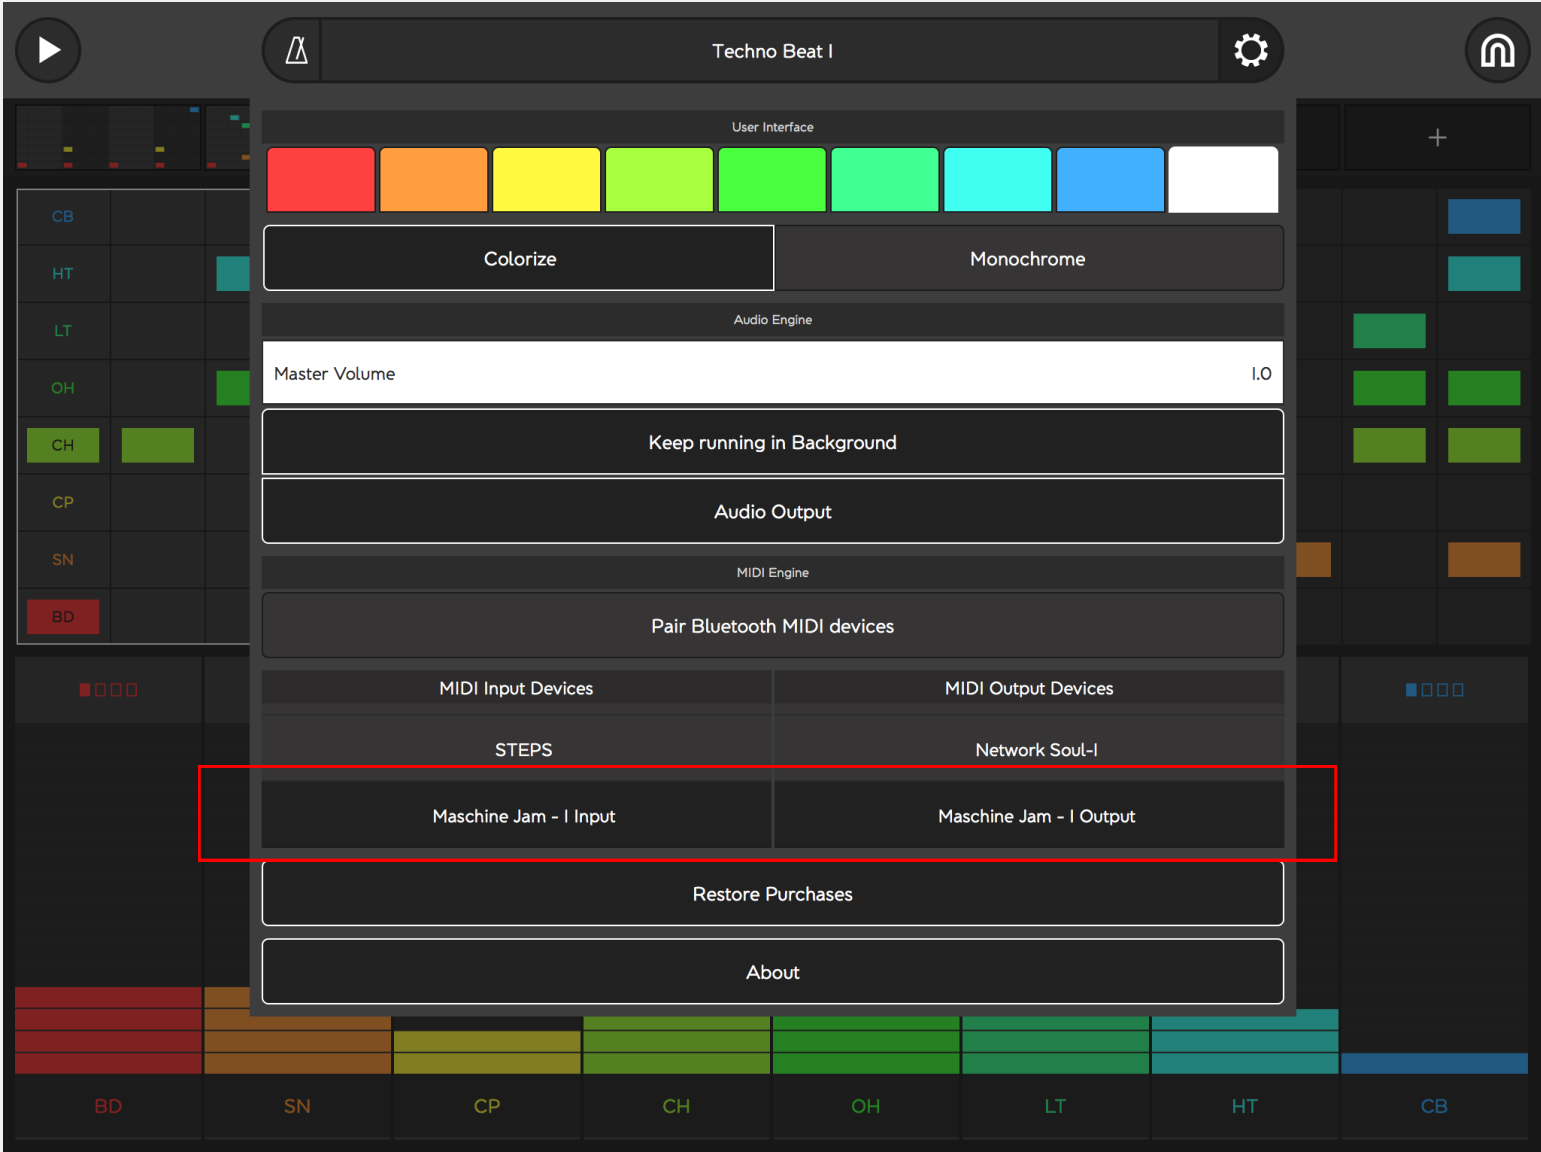

Make sure that your iDevice and the Maschine JAM are plugged into your computer in order to continue.

6 Launch the apps

Now to make it work, open midimux on your iOS device.
Open studiomux on your macOS or Windows device and finally open SNAP.

7 Configure SNAP

Select Maschine JAM input and output from the MIDI settings menu.

8 SNAP

Beats at your fingertips
